DETAILED ACTION

The amendment and remarks filed on 12/05/07 have been acknowledged and entered.

Claims 1-21 have been cancelled. Claims 22-32 and 34-42 are pending.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 22-32 and 34-42 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 22, line 13, "the fluid" and "the direction" lack antecedent basis.

In claim 22, line 14, "the sterilization means (12)", lacks antecedent basis.

In claims 30, 31, 36, and 37 "chamber (2B, 2B2)" lacks antecedent basis.

In claim 41, line 19, "the first treatment chamber (2A0, and at line 24, "the interface chamber (2B1) are without proper antecedent basis.

In claim 42, line 23-24, "the direction", and at line 25, "the sterilizing means (12) are without proper antecedent basis.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1792

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 22-26, 29-32, 34, and 38-39 and 42 are rejected under 35 U.S.C. 103(a) as being unpatentable over McClure et al. (6,451,125) in combination with Rivelli et al. (5,254,246).

McClure et al. disclose a process and apparatus for cleaning pieces. See the abstract, Figs. 1, 3, col. 3, line 32-col. 7, line 32, and the claims.

McClure et al. do not teach the sterilization as claimed.

Rivelli et al. disclose water reclamation system. The reference discloses using sterilization to remove the microorganisms. See the abstract, and the claims.

It would have been obvious for one skilled in the art to use the sterilizer taught by Rivelli et al. in the McClure et al. system, because it is well known in the art to use the sterilizer to remove the microorganisms from a water system.

Response to Arguments

5. Applicant's arguments filed 12/05/07 and 9/18/07 have been fully considered but they are not persuasive. Applicants' argument with respect to claims 22-42 is unpersuasive for the reason set forth in paper No. 20070608.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
